

2001-2005 Yamaha Raptor 660R

Jetting recommendations

- ❑ We recommend the use of the Dynojet jet kit.
- ❑ We also recommend the addition of 27.5 Mikuni pilots in both carburetors.
- ❑ To access the carburetor, take the seat and fuel tank off.
- ❑ Be sure to turn the fuel petcock off before taking the tank off.
- ❑ Take the carburetor off of the motor and pull it up into the open.
- ❑ These recommendations are with the Sparks Exhaust, the Air box lid off, at sea level only. If you're using this kit to tune for another manufacturer's performance products, please contact that manufacturer for additional jetting recommendations.

	Main jet	Needle jet / clip position	Pilot (slow jet)	Fuel screw (from closed)
Raptor 660	DJ 148/150	Dynojet / 4th	27.5	2 +/- .5

- ❑ Reinstall the carburetor making certain that everything is together correctly and tight.
